

Detailed Fashion App Case Study Report

Detailed Case Study Report – Fashion E-Commerce Analytics & Competitor Research

The primary objective was to simulate the role of a data analyst working for a fashion e-commerce company by:

- Setting up analytical tools and platforms
- Creating a sample analytics dashboard using dummy data
- Researching key competitors in the Indian fashion industry
- Identifying user behaviour trends, strengths, and weaknesses of competitors
- Generating insights that could improve business performance

Competitors Analysed:

1. Myntra
2. AJIO
3. Nykaa Fashion

Total Users: Measures the total number of users on the platform.

New Users: Tracks newly registered users during a selected time period.

Daily Engagement: Measures how actively users interact with the app.

Most Viewed Products: Identifies the products with the highest visibility.

App Traffic Source: Tracks where users are coming from such as social media or ads.

Competitor Analysis Summary

Myntra

App Rating: 4.4/5

Popular Features: Large catalog, personalised recommendations, easy returns.

User Complaints: Delivery delays during sales and occasional app lag.

AJIO

App Rating: 4.2/5

Popular Features: Affordable pricing and exclusive fashion collections.

User Complaints: Refund delays and inconsistent product quality.

Nykaa Fashion

App Rating: 4.3/5

Popular Features: Premium fashion experience integrated with beauty products.

User Complaints: Limited availability and slow customer support

Dashboard Insights

- Instagram drives significant traffic due to influencer marketing.
- Sneakers and fashion basics receive the highest engagement.
- Strong daily engagement indicates active users.
- Marketing campaigns are successfully attracting new users.

Competitor Research Analysis

Myntra

Strengths:

- Large product catalog
- Personalized recommendations
- Easy returns

Weaknesses:

- Delivery delays during sales
- App lag during peak traffic

AJIO

Strengths:

- Affordable pricing
- Exclusive collections
- Strong discount offers

Weaknesses:

- Refund delays
- Product quality inconsistency

Nykaa Fashion

Strengths:

- Premium shopping experience
- Beauty and fashion integration
- High-quality branding

Weaknesses:

- Limited product availability
- Slower customer support

Common User Complaints

- Delivery delays
- Refund processing issues
- App crashes during sales

- Product quality mismatch

Key Business Insights

1. Personalization increases user engagement.
2. Faster delivery improves customer retention.
3. Influencer marketing significantly drives traffic.
4. Seamless returns build customer trust.
5. App stability is critical during sales events.

Recommendations

Marketing:

- Invest in Instagram and influencer campaigns
- Use targeted advertisements
- Run seasonal promotions

Customer Experience:

- Simplify returns and refunds
- Improve support response times
- Enhance app speed and UI design

Conclusion

The Indian fashion e-commerce market is highly competitive and customer-driven. Companies like Myntra, AJIO, and Nykaa Fashion compete using personalized experiences, discounts, influencer marketing, and customer convenience.

This case study demonstrates how data analytics helps businesses improve engagement, operational efficiency, customer satisfaction, and profitability.
