

DAY 6 SUBMISSION REPORT

The objective of Day 6 was to analyze user behavior, track key business metrics, and understand customer retention and conversion strategies for a fashion e-commerce platform. The work focused on building analytical dashboards, studying engagement flow, and preparing weekly business insights for decision-making.

Tasks Completed

1. KPI Tracking Dashboard

- Created dashboards using dummy e-commerce data.
- Included metrics like total users, new users, conversion rate, bounce rate, revenue, and traffic sources.

2. User Engagement Flow Analysis

- Analyzed user journey from homepage to purchase.
- Identified drop-off points and engagement trends.

3. Fashion E-Commerce Conversion Strategy Research

- Studied personalized recommendations, influencer marketing, flash sales, and mobile optimization.

4. User Retention Technique Research

- Researched loyalty programs, email campaigns, push notifications, and customer support.

5. Weekly Analytics Summary

- Prepared weekly KPI and performance analysis report.

Retention Analysis

Key Findings:

- Returning customers generated higher revenue.
- Personalized offers improved retention.
- Mobile optimization and loyalty rewards can improve engagement.

Suggested Improvements:

- Improve onboarding experience
- Optimize checkout flow
- Introduce reward systems
- Increase remarketing campaigns

Weekly Performance Overview

Total Users: 18,500

New Users: 11,200

Returning Users: 7,300

Conversion Rate: 3.8%

Bounce Rate: 42%

Average Session Duration: 4m 12s

Revenue Generated: ₹7,85,000

Cart Abandonment Rate: 28%

Final Conclusion

The Day 6 tasks successfully focused on KPI monitoring, user engagement analysis, conversion optimization research, and retention strategy evaluation for a fashion e-commerce business.

The dashboards and analytics reports provided valuable business insights to improve:

- User engagement
- Customer retention
- Conversion rates
- Revenue growth

Skills enhanced during this task:

- Data visualization
- KPI analysis
- Business intelligence reporting
- User behavior analytics
- E-commerce performance analysis
