

Day 8 Submission Report

1. User Engagement Tracking Sheet

A detailed user engagement tracking structure was created using Microsoft Excel and Google Sheets to monitor platform performance and user interaction metrics.

Metric	Sample Value
DAU	12,500
Session Duration	8m 45s
Screen Views	56,000
Try-On Usage	4,300
Product Clicks	18,700
Add to Cart Rate	12.8%
Wishlist Saves	3,450
User Retention	64%
Bounce Rate	28%

2. Fashion Shopping Behavior Analysis

Key Observations

- Users spend more time on products with multiple high-quality images and try-on features.
- Gen Z shoppers prefer personalized recommendations based on browsing history.
- Flash sales and limited-time offers increase session duration and purchase intent.
- Social proof such as ratings, reviews, and influencer content strongly influences purchases.
- Mobile-first browsing behavior dominates fashion shopping applications.

Suggestions for Improving Raritone Engagement

- Improve AI-based personalized recommendations for better engagement.
- Enhance virtual try-on accuracy and accessibility across product categories.
- Introduce gamified rewards and interactive notifications to increase retention.

3. Conversion Funnel Analysis

1. App Open
2. Product View
3. Virtual Try-On
4. Add to Cart
5. Checkout
6. Purchase

Analysis indicates that the highest user drop-off occurs between the Product View and Virtual Try-On stages due to lack of engagement or slower loading experiences.

The Add to Cart to Checkout stage also requires improvement, as users often abandon their carts due to pricing concerns, delivery charges, or complicated checkout processes.

4. Dashboard Improvement Task

- Added graphical KPI visualizations for engagement metrics.
- Created user flow visualization to track user movement through the app.
- Included retention trend charts for weekly and monthly analysis.
- Added growth comparison metrics for active users and sales performance.

5. Competitor Analytics Research

Myntra

- Uses AI-driven personalized recommendations.
- Sends smart push notifications based on user browsing behavior.
- Uses influencer and trend-based engagement campaigns.

Nykaa Fashion

- Focuses on beauty and fashion personalization.
- Uses loyalty programs and reward systems.
- Provides curated product suggestions.

Ajio

- Uses discount-focused notifications and offers.
- Provides category-based personalization.
- Uses interactive UI elements to improve user engagement.

6. Data Visualization Task

Chart 1: Most Viewed Categories

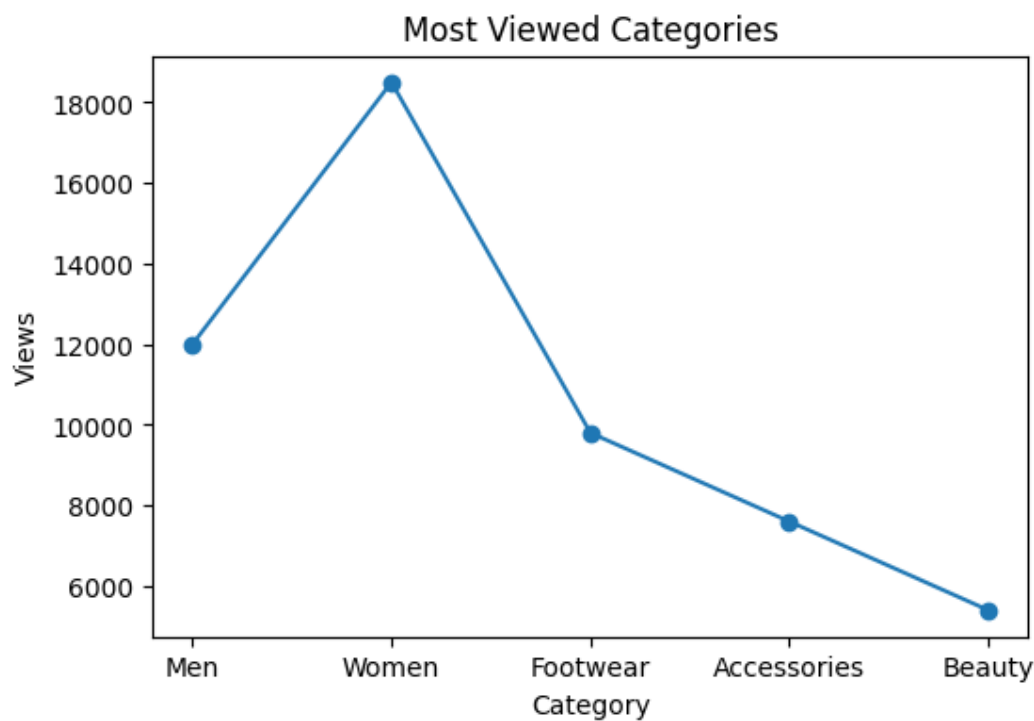

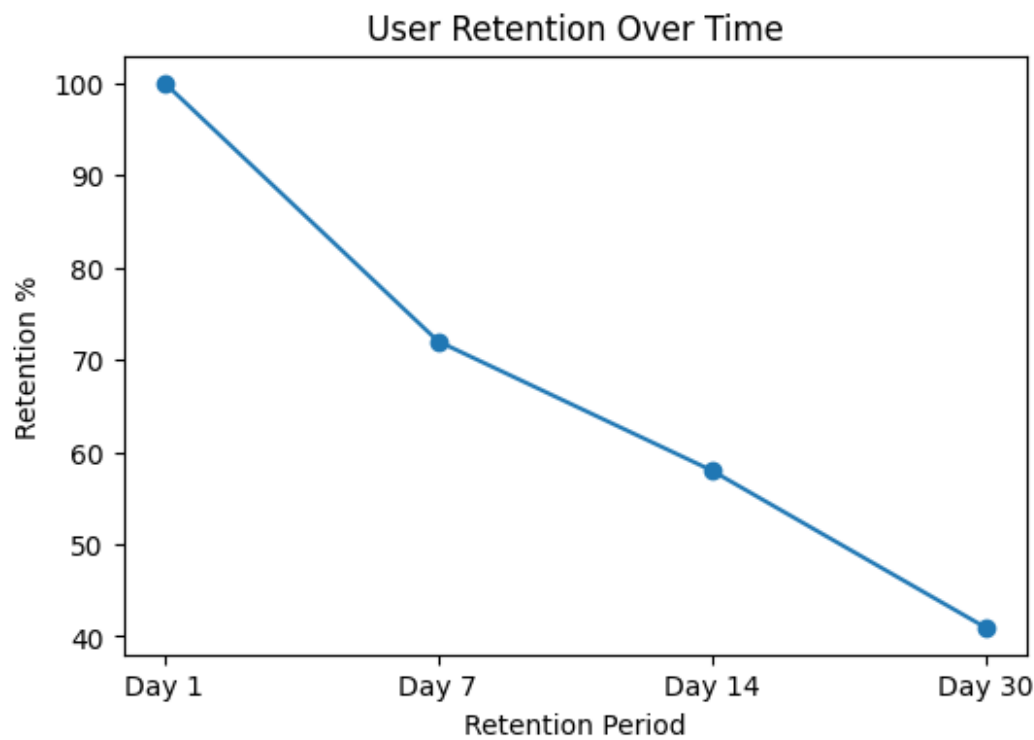

Chart 2: User Retention Over Time

7. Daily Progress Summary

Today's tasks focused on understanding user engagement analytics, conversion funnel analysis, competitor research, and dashboard improvement techniques. Practical exposure was gained in KPI tracking, retention analysis, and user behavior visualization. The activities improved analytical thinking, reporting skills, and data visualization abilities.
