

Data Analyst Team – Day Task

Focus: Customer Behavior & Product Analytics

Executive Summary

The purpose of this analysis is to understand customer behavior in fashion e-commerce platforms and identify factors that influence user engagement, retention, and purchasing decisions. The study also evaluates competitor platforms and provides recommendations for improving user experience within the Raritone ecosystem.

The findings indicate that personalization, virtual try-on features, product recommendations, and simplified purchasing experiences significantly impact customer satisfaction and conversion rates.

1. Shopping Behavior in Fashion E-Commerce Applications

Modern consumers increasingly rely on mobile applications and online platforms for fashion purchases. Users typically spend time browsing products, comparing alternatives, checking reviews, and evaluating product images before making a purchase.

The customer journey generally follows these stages:

1. Product Discovery
2. Product Exploration
3. Virtual Evaluation
4. Purchase Decision
5. Post-Purchase Interaction

Fashion customers are highly influenced by product presentation, personalized recommendations, and ease of navigation.

Key Observations

- Customers prefer visual product experiences.
- Mobile-first shopping behavior continues to increase.
- Personalized recommendations improve purchase likelihood.
- Users spend more time on platforms offering interactive features.

2. Factors Affecting Online Clothing Purchases

Several factors influence whether a customer completes a purchase.

Product Quality Representation

High-quality images and detailed descriptions increase customer confidence.

Pricing

Competitive pricing and promotional discounts significantly affect buying behavior.

Virtual Try-On Features

Customers are more likely to purchase when they can visualize products on themselves.

Customer Reviews

Ratings and reviews help reduce uncertainty during decision-making.

Return Policies

Flexible return options encourage purchases by reducing perceived risk.

Personalization

Customized recommendations improve engagement and conversion rates.

3. User Engagement Analysis

User engagement reflects how actively users interact with the platform.

Engagement Metrics

- Daily Active Users (DAU)
- Session Duration
- Product Views
- Virtual Try-On Usage
- Wishlist Additions

Findings

Users who interact with virtual try-on features spend more time exploring products and demonstrate higher purchase intent.

Interactive product experiences significantly increase user engagement compared to static browsing experiences.

4. Customer Retention Analysis

Customer retention measures the ability to keep users returning to the platform.

Factors Improving Retention

- Personalized recommendations
- Loyalty programs
- Frequent product updates
- Seamless user experience
- Virtual try-on capabilities

Findings

Users receiving personalized suggestions and engagement notifications are more likely to return and complete future purchases.

5. Purchase Decision Factors

The following factors have the greatest influence on customer purchasing decisions:

Factor	Impact Level
Product Images	Very High
Virtual Try-On	Very High
Reviews & Ratings	High
Product Price	High
Brand Trust	High
Discounts & Offers	Medium
Delivery Speed	Medium

6. Mock Analytics Dashboard

Dashboard Metrics

Active Users

- Daily Active Users: 8,500
- Weekly Active Users: 42,000
- Monthly Active Users: 120,000

Virtual Try-On Usage

- Total Try-On Sessions: 18,500
- Average Try-On Duration: 3.8 Minutes
- Repeat Try-On Users: 62%

Product Views

- Total Product Views: 95,000
- Average Products Viewed Per Session: 12

Conversion Funnel

Stage	Users
App Visits	100,000
Product Views	95,000
Virtual Try-On Usage	40,000
Add to Cart	22,000
Purchases	8,500

Funnel Observation

The largest user drop-off occurs between the Add-to-Cart stage and final purchase stage, indicating opportunities for checkout optimization.

7. Competitor Analysis

The following fashion platforms were analyzed:

- Myntra
- AJIO
- Amazon Fashion
- Flipkart Fashion
- Nykaa Fashion

Common Features Observed

- Personalized product recommendations
- AI-based search functionality
- Virtual try-on experiences
- Wishlist and favorites system
- User review and rating systems

8. Recommended Features for Raritone

AI-Powered Virtual Try-On

Enable users to visualize clothing before purchase.

Personalized Recommendation Engine

Recommend products based on browsing and purchase history.

Smart Size Recommendation

Suggest suitable clothing sizes using body measurements.

Wishlist and Favorites

Allow users to save products for future purchases.

Loyalty and Rewards Program

Increase retention through reward points and exclusive offers.

9. Recommendations for Improving User Engagement and Retention

Enhance Product Personalization

Provide customized recommendations using customer behavior data.

Improve Virtual Try-On Experience

Ensure accurate garment fitting and realistic visualization.

Introduce Loyalty Benefits

Reward repeat customers through discounts and exclusive access.

Optimize Checkout Process

Reduce friction by simplifying payment and order confirmation steps.

Use Engagement Notifications

Send personalized alerts regarding products, offers, and wishlisted items.

Conclusion

The analysis demonstrates that customer engagement and purchasing behavior in fashion e-commerce are heavily influenced by personalization, product visualization, and platform usability. Virtual try-on technology has significant potential to improve conversion rates by helping users make informed purchase decisions.

By implementing AI-driven personalization, virtual try-on functionality, loyalty programs, and optimized user experiences, Raritone can improve customer engagement, increase retention, and drive higher sales conversions.
