

CHALLENGES FACED AND SOLUTIONS IMPLEMENTED

RARITONE DATA ANALYST INTERNSHIP

SriVatsav DLSS

INTRODUCTION

During the internship, several challenges were encountered while learning analytics concepts, conducting research, building dashboards, and deriving business insights. Each challenge provided an opportunity to improve problem-solving and analytical skills.

1. UNDERSTANDING ANALYTICS TERMINOLOGY

Challenge Faced

At the beginning of the internship, understanding analytics concepts such as DAU, MAU, Retention Rate, Conversion Rate, Bounce Rate, CTR, and Customer Acquisition Cost was difficult due to limited prior exposure to business analytics.

Solution Implemented

- Studied analytics concepts through online resources and documentation
- Researched real-world examples from fashion e-commerce companies
- Created notes summarizing each metric and its business significance

Outcome

Developed a clear understanding of key analytics metrics and their applications in business decision-making

2. CREATING MEANINGFUL KPI DASHBOARDS

Challenge Faced

Initially, it was difficult to decide which metrics should be included in dashboards and how to present them effectively

Solution Implemented

- Studied dashboards used by leading e-commerce companies
- Prioritized metrics based on business objectives
- Used charts, tables, and KPI cards for visualization

Outcome

Successfully created dashboards that clearly displayed engagement, retention, and conversion metrics

3. COMPETITOR RESEARCH AND ANALYSIS

Challenge Faced

Collecting relevant information from multiple competitors while avoiding information overload was challenging

Solution Implemented

- Focused on key areas: engagement, retention, recommendations, customer experience
- Organized findings into comparison tables
- Highlighted strengths and weaknesses

Outcome

Prepared structured competitor analysis reports with actionable insights

4. UNDERSTANDING USER BEHAVIOR PATTERNS

Challenge Faced

Interpreting why users engage with certain products and abandon others was initially difficult

Solution Implemented

- Studied customer journey concepts
- Analyzed fashion e-commerce behavior trends
- Researched decision-making factors

Outcome

Improved understanding of engagement drivers and purchase behavior

5. CONVERSION FUNNEL ANALYSIS

Challenge Faced

Identifying drop-off points in the user journey and understanding reasons was challenging

Solution Implemented

- Created step-by-step funnel model
- Analyzed each stage separately

- Studied cart abandonment patterns

Outcome

Identified improvement areas in the conversion journey

6. WORKING WITH DUMMY DATA

Challenge Faced

Creating realistic datasets without real business data was difficult

Solution Implemented

- Designed datasets using industry benchmarks
- Maintained logical relationships between metrics
- Used realistic assumptions

Outcome

Built meaningful dashboards using structured sample data

7. UNDERSTANDING RETENTION METRICS

Challenge Faced

User retention and churn analysis concepts were initially confusing

Solution Implemented

- Studied retention models
- Learned Day 1, Week 1, Month 1 retention concepts
- Analyzed churn reduction strategies

Outcome

Gained ability to interpret retention trends effectively

8. LEARNING DATA VISUALIZATION TECHNIQUES

Challenge Faced

Presenting complex data in a simple format was difficult

Solution Implemented

- Learned chart selection techniques
- Used bar, line, pie, and funnel charts
- Focused on clarity and simplicity

Outcome

Improved dashboard quality and data presentation skills

9. UNDERSTANDING VIRTUAL TRY-ON ANALYTICS

Challenge Faced

Virtual try-on analytics was a new concept involving both technology and user behavior

Solution Implemented

- Researched AR/VR in fashion
- Studied competitor implementations
- Analyzed impact on conversion and confidence

Outcome

Gained insights into business value of virtual try-on

10. CONVERTING RESEARCH INTO BUSINESS RECOMMENDATIONS

Challenge Faced

Turning research findings into actionable insights was challenging

Solution Implemented

- Focused on practical business impact
- Connected analytics with user needs
- Prioritized recommendations based on value

Outcome

Generated data-driven business recommendations

OVERALL LEARNING FROM CHALLENGES

The challenges faced during the internship improved analytical thinking, research skills, dashboard creation, and business understanding. Overcoming these challenges strengthened the ability to use data analytics for decision-making in real-world business scenarios.

KEY SKILLS STRENGTHENED

- Data Analysis
- KPI Tracking
- Dashboard Development

- Research Skills
- Business Intelligence
- Customer Behavior Analysis
- Data Visualization
- Problem Solving
- Critical Thinking
- Report Writing

CONCLUSION

Every challenge encountered during the internship contributed significantly to professional growth. Through continuous learning, research, and practical application, these challenges were successfully overcome, leading to a strong understanding of data analytics and its role in business growth.
