

KEY LEARNINGS DOCUMENT

RARITONE DATA ANALYST INTERNSHIP

Intern Name:

SriVatsav DLSS

Internship Role:

Data Analyst Intern

INTRODUCTION

During my internship at Raritone, I gained practical exposure to data analytics, business intelligence, customer behavior analysis, fashion e-commerce insights, and dashboard development. The internship helped me understand how data can be used to improve customer experience, business growth, and decision-making.

This document summarizes the major learnings and skills developed throughout the internship period.

1. UNDERSTANDING BUSINESS METRICS AND KPIs

One of the most important learnings was understanding Key Performance Indicators (KPIs) and their role in measuring business performance.

KPIs Learned

- Daily Active Users (DAU)
- Monthly Active Users (MAU)
- User Retention Rate
- Conversion Rate
- Add-to-Cart Rate
- Session Duration
- Product Views
- Virtual Try-On Usage
- Customer Acquisition Cost (CAC)
- Return on Investment (ROI)

Learning Outcome

I learned how businesses use KPIs to track growth, identify issues, and make strategic decisions.

2. USER ENGAGEMENT ANALYTICS

I learned how user engagement metrics help organizations understand customer interactions within an application.

Concepts Learned

- User activity tracking
- Session analysis
- Screen views
- Feature engagement
- Click-through behavior
- Bounce rate analysis

Key Learning

Higher engagement generally leads to better retention and increased conversion opportunities.

3. USER RETENTION ANALYSIS

Understanding retention was one of the most valuable experiences during the internship.

Concepts Learned

- Day 1 Retention
- Week 1 Retention
- Monthly Retention
- Customer Churn
- Re-engagement Strategies

Key Learning

Retaining existing users is often more cost-effective than acquiring new users. Personalized experiences play a major role in customer retention.

4. CONVERSION FUNNEL ANALYSIS

I learned how businesses analyze customer journeys from discovery to purchase.

Funnel Stages Studied

- App Open
- Product View
- Virtual Try-On
- Add to Cart
- Checkout
- Purchase

Key Learning

Identifying drop-off points in the funnel helps businesses optimize user experiences and improve conversion rates.

5. FASHION E-COMMERCE ANALYTICS

The internship provided insights into the fashion e-commerce industry and customer shopping behavior.

Topics Explored

- Online fashion shopping patterns
- Product discovery behavior
- Purchase decision factors
- Cart abandonment reasons
- Gen Z shopping trends

Key Learning

Visual content, reviews, discounts, and personalization strongly influence fashion purchasing decisions.

6. CUSTOMER SEGMENTATION

I learned how users can be grouped based on their behavior and engagement levels.

Segments Studied

- New Users
- Active Users
- Frequent Shoppers
- Inactive Users
- High-Engagement Users

- Virtual Try-On Users

Key Learning

Different customer segments require different engagement and retention strategies.

7. VIRTUAL TRY-ON ANALYTICS

One of the unique aspects of this internship was understanding virtual try-on technology and its business impact.

Areas Studied

- User adoption of virtual try-on
- Customer confidence improvement
- Impact on purchase decisions
- Engagement benefits

Key Learning

Virtual try-on significantly improves customer confidence and can increase conversion rates while reducing return rates.

8. COMPETITOR ANALYSIS

I researched major fashion e-commerce platforms to understand industry best practices.

Competitors Analyzed

- Myntra
- AJIO
- Nykaa Fashion
- Amazon Fashion

Areas Compared

- User experience
- Recommendation systems
- Marketing strategies
- Customer engagement features
- Retention methods

Key Learning

Successful fashion platforms focus heavily on personalization, recommendations, and loyalty programs.

9. MARKETING ANALYTICS

I learned how marketing performance is measured and optimized.

Metrics Studied

- Engagement Rate
- Click Through Rate (CTR)
- Customer Acquisition Cost
- ROI
- Social Media Performance

Key Learning

Effective marketing requires continuous tracking and optimization based on data insights.

10. ARTIFICIAL INTELLIGENCE IN E-COMMERCE

The internship introduced me to the role of AI in improving customer experiences.

Applications Studied

- Personalized recommendations
- Product suggestions
- User behavior prediction
- Preference tracking
- Smart shopping experiences

Key Learning

AI enables businesses to deliver highly personalized experiences, improving engagement, retention, and sales.

11. DASHBOARD CREATION AND DATA VISUALIZATION

I gained experience in presenting analytics data through dashboards and visual reports.

Tools Used

- Microsoft Excel
- Google Sheets
- Power BI

Dashboard Components

- User Growth Metrics
- Retention Charts
- Engagement Graphs
- Conversion Funnels
- Product Performance Reports

Key Learning

Effective visualizations make data easier to understand and support faster business decision-making.

12. BUSINESS INTELLIGENCE AND DECISION MAKING

I learned how analytics supports business growth and strategic planning.

Areas Explored

- Customer behavior analysis
- Product performance evaluation
- Growth opportunities
- Customer intelligence
- Predictive insights

Key Learning

Data-driven decisions are more reliable and effective than assumptions when planning business strategies.

SKILLS DEVELOPED DURING INTERNSHIP

Technical Skills

- Data Analysis
- Dashboard Development
- Excel Reporting
- Google Sheets Analytics
- KPI Tracking
- Data Visualization

Analytical Skills

- Customer Behavior Analysis
- Retention Analysis
- Conversion Analysis
- Competitor Research
- Business Intelligence

Professional Skills

- Research Skills
- Report Writing
- Presentation Preparation
- Problem Solving
- Critical Thinking

CHALLENGES FACED

1. Understanding complex analytics concepts initially
2. Learning different engagement and retention metrics
3. Designing meaningful dashboards
4. Interpreting customer behavior patterns
5. Converting research findings into business recommendations

How Challenges Were Overcome

- Continuous learning and research
- Studying industry examples
- Practicing dashboard creation
- Analyzing real-world fashion applications
- Applying analytics concepts to business scenarios

OVERALL INTERNSHIP EXPERIENCE

This internship provided valuable practical exposure to analytics and business intelligence within the fashion e-commerce industry. It helped me understand how customer data, engagement metrics, retention analysis, conversion optimization, and AI-driven recommendations contribute to business growth.

The experience improved both my technical and analytical skills while strengthening my understanding of real-world business decision-making.

CONCLUSION

The Raritone Data Analyst Internship was a highly enriching learning experience that enhanced my understanding of data analytics, customer intelligence, virtual try-on technology, fashion e-commerce, and business strategy. The knowledge and skills gained during this internship will be valuable for my future career in analytics, technology, and data-driven decision-making.
