ABOUT RARITONE

Company Overview

- Raritone is a fashion technology platform focused on improving online shopping experiences through:
- Virtual Try-On Technology
- AI-Based Recommendations
- Personalized Shopping
- Customer Intelligence
- Data-Driven Insights
- Business Goal
- Improve customer engagement, retention, and conversion rates through technology-driven shopping experiences.

PROJECT OBJECTIVES

- Primary Objectives
 - Analyze user behavior
 - Understand customer engagement
 - Study retention metrics
 - Analyze conversion funnels
- Secondary Objectives
 - Build KPI dashboards
 - Study competitors
 - Generate business recommendations
 - Improve customer intelligence

ANALYTICS DASHBOARD OVERVIEW

- KPIs Tracked
- User Metrics
 - Total Users
 - New Users
 - DAU
 - MAU
- Engagement Metrics
 - Session Duration
 - Product Views
 - Try-On Usage
- Retention Metrics
 - Day 1 Retention
- Conversion Metrics
 - Add-to-Cart Rate
 - Purchase Rate
 - Conversion Rate
 - Week 1 Retention

USER ENGAGEMENT ANALYSIS

- Metrics Analyzed
- Daily Active Users
- Monthly Active Users
- Session Duration
- Product Views
- Feature Usage
- Try-On Interactions

Findings

- Personalized experiences increase engagement
- Try-on increases product interaction time
- Mobile users show highest activity
- Evening hours have peak engagement

CUSTOMER BEHAVIOR INSIGHTS

- Shopping Journey
- App Open → Browse Products → Product View → Virtual Try-On → Add To Cart → Checkout → Purchase
- Key Observations
- Users compare multiple products
- Reviews influence decisions
- Discounts increase purchases
- Personalization improves engagement

FASHION TRENDS RESEARCH

- Trends Identified
- AI-Powered Recommendations
- Virtual Try-On Shopping
- Personalized Fashion Experiences
- Influencer Marketing
- Social Commerce Growth

VIRTUAL TRY-ON ANALYTICS

- Benefits
- Increased customer confidence
- Better product visualization
- Higher engagement
- Increased conversions
- Reduced return rates
- Key Insight
- Users who use virtual try-on are more likely to purchase products.

CUSTOMER SEGMENTATION

- User Segments
- New Users
- Active Users
- Frequent Shoppers
- Inactive Users
- Try-On Enthusiasts

CONVERSION FUNNEL ANALYSIS

- Funnel Flow
- 1000 App Opens
 - ↓
 - 800 Product Views
 - ↓
 - 500 Try-Ons
 - ↓
 - 350 Add To Cart
 - ↓
 - 220 Checkout
 - ↓
 - 150 Purchases
- Drop-Off Areas
- Product View → Try-On
- Cart → Checkout

COMPETITOR ANALYSIS

- Feature Comparison
- Myntra: Strong recommendations, loyalty programs
- AJIO: Discount-based strategy
- Nykaa Fashion: Premium branding
- Amazon Fashion: Large inventory, fast delivery

COMPETITOR INSIGHTS

- Myntra
Strong personalization and recommendation system
- AJIO
Budget-friendly and wide catalog
- Nykaa Fashion
Premium fashion positioning
- Amazon Fashion
Fast delivery and huge product range

BUSINESS INTELLIGENCE FINDINGS

- Key Findings
- Personalization improves engagement
- Virtual Try-On increases conversion
- Retention drives long-term revenue
- AI improves product discovery
- Checkout friction causes drop-offs

CHALLENGES FACED

Challenges

- Understanding analytics concepts
- Dashboard creation
- Competitor analysis
- Retention analysis
- Funnel analysis

Solutions

- Industry research
- KPI study
- Practice dashboards
- Business analysis

KEY LEARNINGS

Technical

- Data Analytics
- Dashboard Development
- KPI Tracking
- Data Visualization
- Analytical
- Customer Intelligence
- Retention Analysis
- Conversion Optimization
- Business
- Fashion E-Commerce
- Customer Behavior
- Competitor Benchmarking

CONCLUSION

- Key performance indicators (KPIs) were identified and structured to measure platform growth, user engagement, customer retention, and purchase conversion. Analytical frameworks and dashboard models were developed to transform raw user activity data into meaningful business insights that can support strategic decision-making.

THANK YOU
